

# M. HASSAN

React Js, Next Js & React Native Developer

BOR Society, Jinnah Hospital,  
Lahore  
**+923047955183**  
**hassanakram.n@gmail.com**

## EXPERIENCE

### React Developer — SALDIRI

2020 - Present

Working as React Js and React Native Developer at Saldiri, my responsibilities are to build UI/UX interfaces and connect REST APIs, help react interns and junior react developers in their work and solve their queries & errors.

## EDUCATION

### Web & Mobile app developer — Online from SMIT

2019-2020

I have done Web and Mobile Hybrid app development Course from Saylani Mass IT Training Karachi, We have covered HTML, CSS & Javascript along with React js & React Native.

### Intermediate — Govt. College

2017-2019

I have done FSC from Punjab College.

## PROJECTS

### Siraan — E-commerce Mobile App

Siraan is a CS-Cart based e-commerce app. I have rebuilt the old design & made an attractive UI/UX for cross-platform (android & ios) and added more functionalities and screens. I have connected REST Api's in the project using redux-saga as middleware and use redux as state management. This app is live on both the apple store and play store.

Play store link:

<https://play.google.com/store/apps/details?id=com.siraan.storeapp>

## LANGUAGES

- HTML
- CSS
- JavaScript
- Typescript ( Basic )

## LIBRARIES/ FRAMEWORKS

- React Js
- Next Js
- React Native
- Redux
- Redux-Saga
- Axios
- Material UI
- React Bootstrap
- Bootstrap
- React Native Paper

## OTHERS

- Git
- Git Lab
- Bitbucket
- Jira
- Firebase
- React Hooks
- React Life Cycle
- Firebase Database
- Firebase Auth
- Firebase Notification

## TOOLS

- VS Code
- Chrome Debugger
- Postman

## **Meet U — Secure Video Calling App**

Meet U is a secure video conference calling app with face authentication. I have built the project from scratch, I have made UI design of the project and then integrated REST Api's using redux-saga as middleware and managed state using redux. I have integrated video calling using Jitsi Meet an open-source platform for video calling.

*Currently, Meet U is in testing mode.*

## **WFAC — Car Auctions App & Web App**

We Flip Any Car is an app built for selling, buying, and running auctions on cars. We have started this project from scratch and made an attractive design and great user experience. WFAC app was built in React Native CLI. we have used React Native Paper and other libraries/ packages for the UI components. REST APIs were connected using redux-saga as middleware and redux is used as centralized state management. Material UI component ware used in web for design building.

*Currently, WFAC is in development mode.*

## **Chat Buddy — Social App**

Chat Buddy is a social media app. Basic functionality is Chatting and sharing newsfeeds with friends. Chat Buddy is built using firebase services. Firebase Phone authentication is used for login and creating accounts using firebase OTP verification. Firestore is used for storing users' data in cloud storage. React Native paper is used for UI building and react navigation

*Currently, ChatBuddyis in testing mode.*

## **Scholar Den — GRE Test Preparation App**

ScholarDen is a GRE test preparing platform, which offers paid and also non-paid test preparation, what I have done is make the UI of user-facing pages using Material UI, Typescript & Next Js.

*Currently, ScholarDen is in development mode.*

### **LEARNING GOALS**

- NodeJs
- MongoDB
- REST API Development
- VueJs
- Angular

### **INTEREST & HOBBIES**

- Coding/ Programming
- Learning New Tech
- Traveling
